

ENOCH DANIEL

Project Manager | DevOps Engineer | Senior Software Engineer

17, Austin Beguwa Street, Off Orji Road, Asokoro Extension, Abuja,
Nigeria

+2348108735258

enochsturd@gmail.com

PROFESSIONAL SUMMARY

Dynamic and results-driven Senior Project Manager, DevOps Engineer, and Software Developer with over 10 years of experience leading technology projects, software development teams, and digital transformation initiatives across multiple industries including fintech, health tech, edtech, and agriculture. Expert in DevOps, Cloud architecture, AI/ML technologies, and full software development lifecycle management.

Proven track record in delivering complex projects on time and within budget, implementing CI/CD pipelines, migrating legacy systems to cloud platforms, and ensuring system reliability and security compliance. Skilled in Agile methodologies, stakeholder management, risk assessment, and cross-functional team leadership. Adept at leveraging AI/ML, DevOps, and cloud solutions to optimize business processes and drive innovation. Recognized for mentoring teams, driving operational efficiency, and successfully aligning IT initiatives with organizational goals.

CORE SKILLS

Tech & Engineering

- DevOps & Cloud: AWS, Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions, Terraform, Linux, Nginx,
- Software Development: Python, Django, JavaScript, PHP, C++, HTML/CSS, Node.js, MySQL, PostgreSQL
- AI/ML: modelling and MLOps
- Infrastructure: Networking, system installations, virtualization, backup automation, server optimization
- Security: Incident response, threat modeling, security audits, penetration testing

-

Project & Product Management

- Agile/Scrum, product life cycle, requirement engineering, road mapping, risk management, team leadership
- Technical documentation, sprint leadership, stakeholder engagement workflow design.

Soft Skills

- Communication
- Analytical thinking,
- Leadership
- Team Motivation
- client management
- problem-solving.

WORK EXPERIENCE

Project Manager, DevOps Engineer, Senior Software Engineer — IFARMERS Agricultural Products

Services Limited

Agrolinker Project

Abuja, Nigeria

February 2024 – present

- Led end-to-end planning, execution, and delivery of Agrolinker’s core digital agriculture systems, overseeing product strategy, sprint cycles, technical roadmaps, and cross-functional team coordination across engineering, design, data, and field-operations units.
- Directed the development of large-scale software platforms including the farmer marketplace, logistics engine, agent dashboard, payment integrations, and cooperative management tools—ensuring scalability, security, and real-time performance.
- Designed and optimized backend architecture leveraging Python, Django, PostgreSQL, microservices, and secure API infrastructures; improved overall system performance and reliability through code refactoring, caching strategies, and workload optimization.
- Implemented DevOps best practices including automated CI/CD pipelines (GitHub Actions), containerization with Docker, cloud deployments, environment configuration, and continuous monitoring across production systems.
- Built cloud-native infrastructure supporting secure data exchange between farmers, aggregators, transporters, and financial institutions while maintaining high system uptime and platform resilience.
- Collaborated with the cybersecurity and compliance team to integrate NDPR/GDPR-aligned data-protection controls, IAM policies, encrypted services, and incident-response protocols across all Agrolinker platforms.

- Managed stakeholder engagement with partner organizations, government agencies, and investment groups, ensuring clear communication, requirement alignment, and seamless delivery of platform improvements.
- Guided technical teams through Agile methodologies—facilitated standups, retrospectives, backlog grooming, and sprint planning—resulting in faster delivery cycles and higher-quality outputs.
- Oversaw version releases, production deployments, hotfix management, and post-release monitoring while maintaining strong documentation standards for engineering processes and system specifications.
- Mentored junior engineers, conducted technical reviews, and established development standards and workflow automation that improved engineering efficiency and reduced deployment errors by over 40%.

ProjectManager/SeniorDevOpsEngineer—FusionMuseTechnologies, Abuja (2022 – 2024)

- Built CI/CD pipelines that reduced deployment errors by 80%.
- Designed scalable cloud architectures for multiple startup platforms.
- Directed engineering sprints, technical planning, and release cycles.
- Implemented automated monitoring, observability, and security compliance.

Lead Software Engineer — Klick Konnect Akure. (2020 – 2022)

- Developed digital platforms, CRMs, and internal tools for clients.
- Migrated legacy systems to AWS with automated deployments.
- Led a 7-person engineering team through Agile sprint cycles.
- Developed HRMS and Transport Management Systems.
- Implemented CI/CD pipelines to improve deployment speed and reliability.
- Conducted debugging, testing, endpoint support, and infrastructure maintenance.
- Collaborated with management on digital transformation programs.

Project Manager — Spackbit Technologies, Abuja (2016 – 2018)

- Took full leadership of IT and web development initiatives, driving project vision, execution, and delivery across multiple business units.
- Directed cross-functional teams—including developers, designers, and support engineers—ensuring alignment with project goals and operational priorities.
- Oversaw end-to-end project lifecycles, including requirement analysis, solution design, sprint planning, execution oversight, testing, and deployment.
- Implemented structured project workflows that improved delivery speed and reduced operational downtime.

Software Developer / Project Manager — LogicBase Technologies, Lagos (2014 – 2016)

- Led multiple software development projects for SMEs and financial sector clients from initiation to deployment.
- Managed project timelines, sprint cycles, requirement gathering, and stakeholder engagement.
- Supervised a development team in delivering enterprise-grade solutions on time and within scope.
- Designed system architecture, prepared project documentation, and established coding standards.
- Integrated payment systems, automated business workflows, and optimized application performance.

Software Engineer intern — DigitalPlus Integrated Services, Lagos (2013 – 2014)

- Built enterprise-grade applications for SMEs and financial institutions.
- Integrated payment gateways and business process automation.
- Junior Software Developer — TechSphere Solutions, Makurdi (2011 – 2013)
- Supported application development, testing, and documentation.

EDUCATION

MSc Cyber security and Digital Forensics (2026)

Bingham University, Abuja

MSc Mathematical Optimization (2020–2022)

Federal University of Technology, Akure

B.Sc — Mathematics & Computer Science (2013–2017)

Federal University of Agriculture, Makurdi

CERTIFICATIONS

- Project Management Professional (PMP) PMI
- Certified ScrumMaster (CSM) Scrum Alliance
- AWS Certified DevOps Engineer — Professional
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Cisco Network Security
- CYBEROPS+ (Cybersecurity)
- Cisco DEVOps
- Python PCAP Programmer — CISCO
- Google Project Management Certification
- IBM Data Science Professional Certificate
- Cloud DevOps Nanodegree — Udacity

UOKO, Felix Oshioyenoya

Machine Learning Engineer | Research Analyst

PROFESSIONAL SUMMARY

Dynamic Machine Learning Engineer, and Research Analyst with a proven ability to lead high-impact technology initiatives from concept to execution. Skilled in managing cross-functional teams, developing data-driven solutions, and driving organizational growth through innovation. Combines strategic thinking with strong technical expertise in AI, automation, and digital transformation. Adept at building systems, launching programs, and delivering measurable results in fast-paced environments.

EDUCATION

Doctor of Philosophy in Computer Science – PhD (In View) University of Benin, Edo State Nigeria	2025
Master of Science – M.Sc, in Computer Science (Distinction) University of Benin, Edo State - Nigeria	2018
m-MBA in Innovation, Growth & Digital Execution Tekedia Institute, Nigeria	2023
Bachelor of Science in Computer Science Second Class Honors, Upper Division University of Benin, Edo State - Nigeria	2012
Secondary School Leaving Certificate Standard College, Delta State - Nigeria	2008

EXPERIENCE

Data Analyst – IFARMERS Agricultural Products Services Limited Agrolinker Project Abuja, Nigeria	April 2024-Present
- Collected, cleaned, and analyzed agricultural and market data to support the development of the Agrolinker platform. - Built interactive dashboards and reports using Power BI and Excel to track farm inputs, yields, pricing trends, and user interactions. - Collaborated with the engineering and product teams to transform data insights into product features and platform improvements. - Developed SQL queries for data extraction, validation, and performance monitoring of the Agrolinker system.	

Veritas University Abuja - Nigeria**Jan. 2021 - Date****Job Role: AI Researcher**

- Conduct research in artificial intelligence with a focus on machine learning, data-driven modeling, and intelligent systems.
- Develop and evaluate ML algorithms for classification, prediction, and pattern recognition tasks relevant to academic and industry problems.
- Perform data collection, preprocessing, annotation, and exploratory analysis to support research experiments.
- Collaborate with faculty, research groups, and labs to produce publications, reports, and technical documentation.

Abixa Analytics, Abuja - Nigeria**Jan. 2023 - Date****Job Role: Project Manager****Responsibilities**

- Lead end-to-end planning, execution, and delivery of data analytics and technology-driven projects.
- Coordinate cross-functional teams including data analysts, engineers, designers, and client stakeholders to ensure timely project execution.
- Develop project scopes, requirements, timelines, and resource plans aligned with organizational objectives.
- Oversee project budgets, risks, and quality assurance to ensure deliverables meet expected standards.

Zoom City Tech, Abuja - Nigeria**Jul. 2019 – July 2023****Job Role: Senior software Manager****Responsibilities**

- Led strategic planning, operations management, and business development initiatives across the technology and services divisions.
- Supervised cross-functional teams, ensuring high performance, productivity, and alignment with organizational goals.
- Oversaw project delivery for digital, IT, and technical deployments, ensuring timelines, budgets, and quality standards were met.
- Managed client relationships, coordinated stakeholder communications, and secured repeat business through consistent service excellence.
- Evaluated organizational processes and implemented operational improvements to enhance efficiency and service delivery.

Pinsky Company, Delta State Nigeria**Jan. 2017 – Sept. 2018****Job Role: Digital Executive (Full-time)****Responsibilities**

- E-Commerce Application build and deployment
- Digital Marketing

SKILLS

Project & Product Management

- Project scoping, requirement gathering, documentation
- Cross-functional team coordination and stakeholder management
- Risk assessment, reporting, performance tracking
- Product lifecycle support and strategic implementation

Data Analytics & Business Intelligence

- Power BI, Excel (Advanced), SQL (MySQL, MSSQL), Python (Pandas, NumPy)
- Data modeling, data cleaning, trend analysis, KPI monitoring
- Interactive dashboard development, ETL automation
- Forecasting, segmentation, business performance analytics

Machine Learning & AI Development

- Predictive modeling, classification, regression
- Anomaly detection, clustering, feature engineering
- Model evaluation (A/B testing), ML pipeline integration
- Research and experimentation for applied AI solutions

Research & Strategy

- Literature reviews, hypothesis testing, analytical reporting
- Market research, competitive analysis, feasibility studies
- Problem framing, insights generation, strategic recommendations

Tools & Technologies

- Power BI, Tableau, Python, Git
- Jupyter Notebook, Google Colab
- Django Rest Framework

Soft Skills

- Analytical reasoning
- Leadership & team coordination
- Communication & presentation
- Critical thinking & problem-solving
- Innovation & strategic execution

THESIS / DISSERTATIONS

- Comparison between Convolutional Neural Network (CNN) and Recurrent Neural Network (RNN) for Online and Offline Signature Verification **(Ph.D)**
- A Machine Learning based Fraud Detection Model: A case study of the Credit Card Sector

(M.Sc) RESEARCH PROFILE

- **Google Scholar Profile:** <https://scholar.google.com/citations?user=v8mhk-kAAAAJ&hl=en> h-index: 3 Citations: 20
- **Web of Science ID:** AHE-5308-2022

THOMAS ENESI BAIDOO

CYBERSECURITY SPECIALIST | DATA COMPLIANCE EXPERT

Block 16 flat 1, custom estate opposite Arab junction kubwa. FCT Phone No:

+2348163422571. Email: hostey2010@yahoo.com

PROFILE SUMMARY

Innovative, detail-oriented, and result-driven Cybersecurity Specialist, and Data Compliance Expert with over 10 years experience in software engineering, secure system design, and the delivery of scalable digital platforms across multiple sectors. Demonstrated success leading multidisciplinary teams, managing cross-functional enterprise projects, and implementing robust data-protection frameworks that ensure security, regulatory compliance, and operational resilience.

Highly skilled in Agile methodologies, workflow optimization, secure SDLC practices, and end-to-end system integration. Adept at designing and managing AI-driven products, healthcare technology solutions, logistics platforms, eCommerce systems, and mobile/web applications supporting high-volume user operations. Proven ability to collaborate with executives, developers, security teams, field agents, and stakeholders to deliver user-centered solutions aligned with organizational goals.

Experienced in implementing cybersecurity controls, conducting risk assessments, enforcing compliance with NDPR/GDPR principles, and building security architectures that safeguard sensitive data. Known for strong leadership, analytical thinking, documentation excellence, and the ability to streamline processes while ensuring data integrity, privacy, and platform scalability. Committed to driving innovation, enhancing digital trust, and supporting business growth through secure, compliant, and intelligently engineered technology solutions.

KEY SKILLS

- Cross-Functional Team Leadership
- Requirements Gathering & Documentation
- Risk Management & Mitigation
- Stakeholder & Vendor Management
- Workflow Optimization
- Sprint Planning & Release Management
- Vulnerability Assessment & Penetration Testing
- Identity & Access Management (IAM)
- Secure SDLC & Secure Coding Practices
- Network & Application Security

- Threat Monitoring & Incident Response
- Agile Project Management (Scrum, Kanban, Sprint Planning)
- Product & Platform Development
- Technical & Business Requirements Documentation
- Logistics Collaboration (FedEx, Skynet Shipping)
- eCommerce Systems Coordination (IXXO eCommerce)
- AI/LLM Integration & System Automation
- Stakeholder Management
- Cross-functional Team Leadership
- Process Mapping & Workflow Optimization

WORK EXPERIENCE

Team Lead, Cybersecurity & Data Compliance—IFARMERS Agricultural Products Services Limited

AFAN Project Abuja,

Nigeria

February 2024 – present

- Led AFAN's Cybersecurity and Data Compliance division, overseeing the security posture, privacy frameworks, and data-governance processes across all digital agricultural platforms.
- Supervised a multidisciplinary team responsible for vulnerability assessments, incident response, compliance audits, and secure software development practices.
- Designed and implemented the organization's end-to-end security architecture, including API protection, identity and access management (IAM), encryption protocols, and secure CI/CD pipelines.
- Directed periodic penetration tests, threat modeling sessions, and application-level security reviews to identify and mitigate vulnerabilities across backend, mobile, and cloud systems.
- Established data-compliance frameworks aligned with NDPR, GDPR principles, and internal data-classification standards, ensuring lawful data processing, retention, and access controls.
- Conducted comprehensive compliance audits, privacy-impact assessments, and risk-evaluation exercises to maintain regulatory readiness and safeguard sensitive farmer, cooperative, and financial data.
- Championed privacy-by-design practices by collaborating with product, engineering, and data teams, ensuring new product features (pricing models, logistics automation,

farmer onboarding, etc.) adhered to security and compliance protocols from inception.

- Authored and maintained documentation including cybersecurity policies, data- protection guidelines, incident reports, audit logs, and compliance registers used for internal governance and regulatory submissions.
- Trained engineering teams, field agents, and administrative staff on secure data handling, privacy requirements, incident reporting, and cyber hygiene, reducing internal security violations and improving organizational security awareness.
- Collaborated with legal, executive management, and external regulators to address compliance inquiries, validate controls, and support certification or audit processes.

Project Manager – Sedher Luminaries & Sedher Collaboration Sedher Health

Systems | 2020 – 2024

Project Overview:

Led the development of *Sedher Luminaries*, an AI-powered professional marketplace for healthcare experts, and *Sedher Collaboration*, a workflow and communication hub for project execution between experts, hospitals, and companies.

Key Responsibilities and Achievements:

- Directed the complete lifecycle of the two-platform ecosystem—from concept development to deployment.
- Coordinated cross-functional teams including frontend developers, backend engineers, UI/UX designers, and AI integration specialists.
- Supervised the frontend overhaul using Next.js, Tailwind CSS, Shadcn/UI, ensuring a modern user experience.
- Oversaw backend design leveraging NextAuth.js, PostgreSQL, Prisma, and system- wide authentication (Email/Password + Google & GitHub OAuth).
- Defined business requirements, technical specifications, workflows, and system architecture documentation.
- Integrated advanced AI components to support profile matching, expert recommendations, and operational automation.
- Implemented project governance frameworks, risk logs, and quality assurance processes.
- Led stakeholder sessions with hospitals, healthcare consultants, and internal business units to refine platform features.
- Managed timelines, deliverables, team performance, and sprint reviews ensuring on-time delivery.

- Enhanced operational efficiency by designing payment processing workflows, project tracking modules, and administrative dashboards.
- Prepared executive-level presentations, progress reports, and deployment readiness documentation.

IMPACT & RESULTS

- Delivered a scalable expert-pool platform with seamless onboarding for healthcare professionals across multiple specializations.
- Established a collaboration module that improved communication, task tracking, and project delivery for partner organizations.
- Increased expert engagement and platform usability through streamlined UI/UX and AI-assisted features.
- Improved internal productivity by introducing structured project workflows and clear cross-team communication frameworks.

Software Project Manager

68A Adeola Odeku Street, Victoria Island, Lagos, Nigeria

RhodCom IT Services – 2017 - 2020

RhodCom is a technology firm providing backend infrastructure and database-driven SaaS solutions for B2B organizations, supporting suppliers, retailers, and enterprise data management operations.

Key Responsibilities & Achievements

- Implemented a full software development lifecycle (SDLC) framework and successfully transitioned the team to Agile methodology, significantly improving delivery speed and collaboration.
- Identified and executed structural engineering improvements that enhanced developer productivity, system reliability, and responsiveness to new feature requests.
- Designed and deployed critical software tools that reduced system failure rates by 70%, improving product stability and customer satisfaction.
- Established comprehensive documentation standards and developed a training program to enhance team competency in both hardware and software processes.
- Led the design and implementation of an analytics platform that improved data visibility and strengthened customer engagement strategies for clients.
- Oversaw team budgeting, conducted staff training, and managed resource allocation and role optimization to support evolving project needs.

NEPTUNE SOFTWARE GROUP LIMITED PLC, (2014 – 2017).

24 Parklane, Apapa GRA, Lagos, Nigeria

Software Developer

Responsibilities:

- I actively participated in developing a SOAP web service for our financial banking

solution called Rubikon, alongside a seasoned team of partners' developers in Chennai. It was deployed for our client, Amju Microfinance Bank, Port Harcourt, covering major business processes including Account processing, Funds Transfers, and Transactions.

- I was part of a team of developers that developed web service for our financial institution core banking app called Orbit that interfaced with Bank-One core to successfully communicate with each other. It was deployed for our client, Addossar Microfinance Bank. We leveraged on SOAP web service protocol to achieve this feat because of its strong security features and worldwide acceptance.
- I took an active role in developing a financial mobile banking app, mBranch, leveraging on Ionic-Cordova alongside REST web service targeted for major mobile phones devices such as Android and Windows. The app is called mBranch app. It's an innovative mobile app that has flavors of offline capabilities suited for sub-Saharan Africa where internet communication is not so good. Also, there is Group Loan module among others that affords customers to book loans, and repays on the go over the app. The app has an e-mail module that enables clients to contact us for support.
- I was involved in the development of an enhancement for Bank of Industry, BOI, Self Service legacy web app that is an HR management application used by their employees. I participated along with other developers to develop different modules such as Leave Request, Leave Returns among others. I leveraged on VB.Net to achieve this.
- Extraction of data and generation of reports on demand from disparate business processes using iReport, for Bank of Industry, BOI and its presentation to the decision makers for informed analysis
- Play a key role in upholding company coding conventions and test-driven methodology to deliver before deadline.
- I was involved in the development of an app called Device GPS locator, an android mobile app that detects the location of a device and the device unique serial number especially in case of thief and log it on the server.
- My job role spilled into installation and configuration of our Core Financial Banking app, Rubikon for our clientele.

GDSS ABBARE, TARABA STATE, NIGERIA (2013)

Members of National Youth Service Corps

- Data entry and management.
- Basic system maintenance and system security.
- Computations and verification of data specified in files submitted.
- Responsible for the purchase of IT items such as Software's, UPS, etc. to ensure compliance with the needs of my department.
- Managed the Computer Lab

- Tutored School children on System repair and Maintenance.

EDUCATION

- MSc computer Science 2022
Ahmadu Bello University Zaria Computer Science.
- BSc. Computer science. 2012
Ahmadu Bello University Zaria Computer Science.
- Kebbi State University of Science and Technology, Nigeria (2013).

CERTIFICATIONS

- Institute of strategic Entrepreneurs of Nigeria.
- Software as a Service (online Certificate UC Berkeley US.)
- Agile Project Management (AgilePM) Certification
- Scrum Master Certification (PSM I / CSM)
- Certified Information Systems Security Professional (CISSP) – ISC²
- Certified Ethical Hacker (CEH) – EC-Council
- CompTIA Security+
- CCNA

AWARDS

- Etisalat Merit award for academic performance. (2010)

INTERESTS

- Travelling, Reading, football, table-tennis and chess.

BENSON AGEJI

Data Analyst | Business Intelligence Analyst | ML/Data Engineer

Abuja, Nigeria

PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst & Business Intelligence Professional with over 5 years of progressive experience in analytics, BI development, machine learning, data modeling, automation, dashboard design, and organizational performance optimization across the power, consulting, and technology sectors. Skilled in transforming complex data into strategic insights that drive revenue growth, operational efficiency, and data-driven decision-making. Highly proficient in Power BI, SQL, Excel, Python (Pandas, NumPy, Matplotlib, Seaborn), forecasting models, KPI systems, and enterprise reporting frameworks.

CORE SKILLS

Data Analytics & BI

- Power BI, Excel (Advanced), SQL (MySQL, MSSQL), Python (Pandas, NumPy)
- Data modeling, data cleaning, trend analysis, KPI monitoring
- Interactive dashboard development, ETL automation
- Forecasting, segmentation, business performance analytics

Machine Learning

- Predictive modeling, classification, regression
- Anomaly detection, clustering, feature engineering
- Model evaluation (A/B testing), ML pipeline integration

Tools & Technologies

- Power BI, Tableau, Python, SQL Server, Git
- Jupyter Notebook, Google Colab
- Cloud basics (AWS), Data Warehousing concepts

Soft Skills

- Analytical reasoning

- Critical thinking
- Communication & presentation
- Project planning
- Stakeholder management

PROFESSIONAL EXPERIENCE

Machine Learning Engineer — IFARMERS Agricultural Products Services Limited

Agrolinker Project

July 2024 - present

- Developed machine learning models for crop disease detection, yield prediction, and sentiment analysis from farmer-feedback text.
- Built classification and regression models using Python, Scikit-learn, TensorFlow, and PyTorch.
- Fine-tuned transformer models (BERT, DistilBERT) to classify farmer concerns and recommend targeted agricultural resources.
- Collected, cleaned, and annotated datasets for training, achieving up to 94% model accuracy in production test cycles.
- Deployed ML models using FastAPI and integrated them into mobile and web apps used by cooperatives and extension agents.
- Implemented MLOps practices including model versioning, dataset tracking, and automated evaluation pipelines.

Machine Learning / Data Analyst Engineer

QuantifyAI Technologies, Abuja

Feb 2025 – Present

- Designed and deployed ML models for segmentation, anomaly detection, and performance forecasting.
- Integrated ML pipelines into analytics dashboards for real-time executive reporting.
- Automated Python/SQL workflows improving processing speed and data accuracy.
- Led cross-functional teams through data projects and KPI-focused analytics sprints.

Business Intelligence Analyst

TechBridge DataWorks, Lagos (Remote)

Jan 2023– Nov 2024

- Built enterprise Power BI dashboards covering finance, operations, and customer analytics.
- Developed SQL models, DAX measures, and optimized ETL flows.
- Improved revenue forecasting accuracy by 25% through statistical modeling.
- Implemented BI governance, documentation, and metadata standards.

Data Analyst

BlueNova Insights Consulting, Abuja

Jan 2020– Dec 2021

- Provided analytics consulting for fintech, retail, and energy clients.
- Built automated KPI dashboards reducing manual reporting by 70%.
- Conducted statistical analysis and EDA to drive strategic recommendations.
- Designed executive data visualizations for strategic decision-making.

Business Data Analyst

Fusion Data Systems, Lagos (Remote)

April 2022 – April 2024

- Built forecasting models and automated dashboards for sales and marketing analytics.
- Performed business performance analysis across customer segments.
- Reduced reporting time from days to hours by automating Excel/BI workflows.

Data Analyst

Abuja Electricity Distribution Company — AEDC

February 2025 – Present

- Co-created ATC&C losses dashboard covering 45 districts across 4 states.
- Built SBT Feeder Performance dashboard resulting in **N500M+ monthly revenue impact**.
- Conducted transformer/customer alignment improving billing accuracy.

- Prepared NERC compliance and regulatory reports.

Data Analyst Intern

EDUCATION

B.Sc. Computer Science

Veritas University, Abuja

2012 – 2017

PROFESSIONAL SUMMARY

Innovative and results-driven Backend/Mobile Engineer with over 8 years hands-on experience designing, developing, and deploying scalable software solutions across fintech, legal tech, real estate, health, and entertainment sectors. Skilled in building high-availability backend systems, API architectures, automation pipelines, and mobile applications that enhance user experience and operational efficiency. Adept at translating complex business requirements into secure, maintainable, and high-performance systems using modern technologies such as Node.js, NestJS, React Native, Golang, and cloud platforms (AWS, Azure, GCP).

A collaborative engineering leader with a proven ability to work cross-functionally, deliver mission-critical features, and drive product innovation in fast-paced, remote-first environments.

EXPERIENCE

Backend Developer — IFARMERS Agricultural Products Services Limited

Abuja, Nigeria

Agrolinker Project

February 2024 – present

- Designed and implemented backend services supporting Agrolinker's agricultural marketplace, logistics engine, and cooperative management system.
- Developed secure user authentication flows, role-based access management, and farmer-agent workflow automation.
- Optimized database schemas and query performance, improving speed of key endpoints by 42%.

- Integrated AI-generated pricing insights produce recommendations, and logistics predictions into backend workflows.
- Implemented background job scheduling for notifications, produce updates, and market price broadcasts.
- Deployed backend services on cloud infrastructure using Docker, CI/CD pipelines, and automated testing suites.

Backend Engineer — FixmasterPOS

New York, NY (Remote)

September 2024 – Present

- Built a large-scale bill payment system supporting **150+ cross-platform service providers** across the U.S. and internationally.
- Engineered a **time-tracking system** enabling employee clock-in/clock-out, break logging, and automated daily wage computation.
- Developed **FixMaster POS API v2**, delivering major improvements in performance, scalability, and fault tolerance.

Mobile Engineer (Contract) — Script Desk

Lagos, Nigeria (Remote)

June 2024 – April 2025

- Designed and built a loan management mobile platform, enabling loan requests, approval workflows, and repayment tracking.
- Developed a healthcare mobile system supporting appointment booking, diagnosis entry, and prescription management to improve patient experience.
- Created Nimi, an NFC-powered engagement platform enabling artists to deliver personalized, exclusive fan experiences.

Backend Engineer (Contract) PocketLawyers

Lagos, Nigeria (Remote)

March 2024 – July 2024

- Developed a virtual legal services platform, enabling secure chat, document sharing, and real-time consultations.

- Built a collaboration suite (Slack/Trello-inspired) for lawyer workflows and mobile-first productivity.
- Implemented lawyer profile systems with metrics dashboards, KYC verification, and service listings.
- Integrated secure escrow payments and developed an admin monitoring dashboard for platform governance.

Backend Engineer — Turfind

Abuja, Nigeria (Remote)

February 2024 – Present

- Built a secure end-to-end real estate payment and escrow system, ensuring transaction protection and user trust.
- Engineered a dynamic property marketplace with 3D virtual tour compatibility.
- Implemented real-time buyer–seller chat, enabling instant communication and faster deal cycles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go (Golang), Python

Frameworks / Libraries: Node.js, NestJS, Express, Fastify, React Native, Gin

Tools & Platforms: Git, Terraform, AWS, Azure, Google Cloud Platform, Bash, Xcode, Jenkins

Practices & Methodologies: CI/CD, Test Automation, Agile, Scrum, SDLC, Software Testing, API Architecture

EDUCATION

B.Sc. Computer Science

Ahmadu Bello University, Zaria

2014 – 2018

PROJECTS

Dishpatch . Node.js, MongoDB, Redis, CI/CD

- Developed scalable APIs for menu browsing custom orders, delivery tracking, payments, routing optimization, referrals, and reviews.
- Built a full **restaurant operations dashboard** covering rider management, customer support, reporting, metrics, and overall platform configuration.

How-Much .Node.js, MongoDB, CI/CD, OpenAI

- Built an intelligent **pricing engine** that uses developer profile + project parameters to generate optimized rate proposals.
- Integrated **OpenAI**, authentication, and multi-currency support to produce personalized, globally adaptable pricing insights.

OHIKHENA ESTHER O.

UI/UX Designer

Abuja, Nigeria

olohicreates101@gmail.com

+234 701 665 7016

PROFESSIONAL SUMMARY

Creative and user-centric Product Designer with hands-on experience in UI/UX design, digital product development, and user research. Skilled in transforming complex problems into intuitive and visually compelling solutions using modern design tools and frameworks. Experienced collaborating with cross-functional teams including developers, business analysts, and product managers to deliver functional, human-centered digital experiences. Passionate about accessibility, design systems, gamification, and product strategy that drive measurable user and business outcomes.

EXPERIENCE

AFAN (All Farmers Association of Nigeria) Project

UI/UX Designer & Data-Aware Product Developer — IFARMERS Agricultural Products Services Limited

Remote / Abuja, Nigeria

February 2025 – present

- Designed digital tools that supported AFAN's mission to modernize farmer engagement, crop data reporting, and cooperative management across Nigeria.
- Created UI/UX flows for the AFAN analytics dashboard, enabling real-time visibility into farmer profiles, crop yields, seasonal trends, and agricultural risks.
- Conducted research interviews with local farmers, extension workers, and agro-cooperatives to gather high-impact product requirements.
- Developed interactive prototypes for mobile and web applications supporting crop disease alerts, fertilizer subsidy enrollment, and market linkage programs.

- Improved usability and accessibility of AFAN's digital platforms, resulting in a smoother onboarding experience for non-technical rural users.
- Worked with data analysts to translate agricultural datasets into intuitive visualizations using charts, maps, and actionable insight modules.

Product Designer — PayWave Financial Technologies

Lagos, Nigeria (Remote)

May 2024 – Present

- Designed 100+ mobile and web screens for financial products using a structured design system.
- Conducted user research, interviews, and usability tests that improved task completion rate by 40%.
- Collaborated with backend and frontend engineers to ensure accurate and efficient design implementation.
- Developed interactive prototypes for investor pitches, increasing product approval rate.

Product Designer — Bluetech Digital Innovations

Abuja, Nigeria

May 2022 – April 2024

- Led UI/UX design for enterprise dashboards, mobile apps, and customer experience portals.
- Created wireframes, prototypes, and complete style guides to standardize product development.
- Worked closely with product managers to define business requirements and user flows.
- Facilitated user testing and implemented iterative improvements based on feedback.

Software Developer — ByteLabs Digital Solutions

Abuja, Nigeria

May 2020 – April 2022

- Built and maintained Python/Django applications, improving backend performance by 30%.
- Developed reusable UI components using HTML, CSS, and JavaScript.
- Assisted in database modeling, API design, and system documentation.
- Collaborated in an agile team to deliver weekly product iterations.

Product Designer / AI Researcher — AgricScan Project

Abuja, Nigeria

May 2018 – April 2020

- Designed a 60+ screen mobile app for farmers using extensive UX research and testing.
- Built a machine learning model that achieved 96% accuracy in detecting rice crop diseases.
- Translated research findings into intuitive user flows for early disease detection.
- Created a design system to unify visual identity across web and mobile.

Product Designer — Nexa Creatives Studio

Abuja, Nigeria

May 2018 – Nov 2018

- Supported UI/UX teams with wireframes, mockups, and simple prototypes.
- Assisted in brand identity creation and typography decisions.
- Participated in user research and compiled insights into structured reports.
- Improved design consistency across client apps and websites.

Product Design Instructor NACOS UI/UX Club, Veritas University

Abuja, Nigeria

May 2017 – April 2019

- Taught foundational UI/UX concepts to student beginners.
- Conducted bootcamps and workshops with hands-on design tasks.
- Guided students through portfolio projects and design critiques.

Software Developer Intern — AlphaCode Technologies

Abuja, Nigeria

May 2012 – April 2014

- Assisted in development of internal tools using HTML, CSS, and Python.
- Learned foundational development processes including git, debugging, and documentation.
- Contributed to frontend page layouts and simple backend functions.

SKILLS

Design Skills

- UX Research
- Wireframing
- Prototyping
- Empathy Mapping
- Competitor Analysis
- MVP Scoping
- Design Systems
- Gamification Strategies
- Usability Testing

Tools

- Figma
- Adobe Photoshop
- Adobe Illustrator
- Adobe Premiere Pro
- Adobe XD
- VS Code

Programming

- HTML/CSS
- JavaScript
- Python
- Django
- C++

CERTIFICATIONS

- CISCO – Introduction to Internet of Things
- CISCO – Introduction to Computer Hardware
- CISCO – Introduction to Data Science
- HIIT – Software Development

EDUCATION

B.Sc. Computer Science

Veritas University, Abuja

2012 – 2017

ABU MIRACLE OJOCHOLE

Frontend Developer | Smart Contract Developer | Web3

Kaduna, Nigeria

miracleabu07@gmail.com | +234 912 959 8415

PROFESSIONAL SUMMARY

Frontend & Smart Contract Developer with hands-on experience building high-performance web applications, digital identity workflows, and blockchain-backed verification systems. Skilled in developing secure, scalable, user-centric platforms using React, Next.js, Tailwind CSS, and Web3 technologies. Demonstrated ability to collaborate in cross-functional teams on AI-enabled, agriculture-focused platforms such as Agrolinker, supporting farmer profiling, digital KYC, and decentralized record verification. Passionate about using technology to improve digital agriculture, financial inclusion, and system transparency.

CORE TECHNICAL SKILLS

Frontend Development:

React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive UI, Component Architecture

Blockchain & Smart Contracts:

Solidity, Hardhat, Mocha, Foundry, NFT-based credentialing, Secure contract patterns, Web3.js, Ethers.js

Tools & DevOps:

Git, GitHub, Vercel, npm, REST API Integration

Additional Competencies:

Figma, UI/UX Design Principles, Design Systems, Frontend Performance Optimization

RELEVANT PROJECT EXPERIENCE

– IFARMERS Agricultural Products Services Limited

April 2024-

Present Agrolinker Project

Frontend Developer

Key Contributions:

- Built responsive user interfaces for farmer onboarding, crop-cycle tracking, and investment dashboards.
- Integrated React-based components with backend APIs used for farm profiling, farm-size display, and investor activity.
- Designed clean UI flows to support KYC, digital identity, and farmer portfolio visibility.
- Ensured mobile-first experience to support areas with low bandwidth and rural access patterns.
- Collaborated with backend and AI teams for the geospatial and yield forecast modules.

BlockFund (2022) – Lead Developer

Built a full-stack blockchain donation dApp enabling transparent and tamper-proof crowdfunding.

Contributions:

- Developed full responsive frontend using Next.js.
- Integrated smart contracts with Wagmi, RainbowKit, and MetaMask for wallet connections.
- Enabled fully transparent donation records stored on-chain.

BlockDegrees (2021 - 2022) – Smart Contract Developer & Project Manager

Developed blockchain-based credential verification using ERC-721 NFTs.

Contributions:

- Engineered smart contracts to issue tamper-proof certificates.
- Provided instant verification workflows for institutions and employers.

Lilies Food (2019-2022) – Frontend Developer

- Created a responsive food ordering platform with intuitive UI for meal selection, summaries, order history, and cart management.

INTERNSHIPS

Khemsafe Computers and Communications Ltd (July – Sept 2020)

- Learned web development foundations and responsive design.
- Practiced HTML/CSS, UI layouts, graphic design, and website optimization.

Colab Innovation Campus (July – Oct 2020)

- Three-month intensive blockchain engineering program.
- Gained experience in smart contract development, dApp integration, and Ethereum ecosystem tools.

EDUCATION

B.Sc Computer and Information Technology (First Class, 4.91 CGPA)

Veritas University, Abuja

2015 - 2019

CERTIFICATIONS & ACHIEVEMENTS

- Cisco Certificate – IoT Fundamentals: Connecting Things
- Best Graduating Student – Faculty of Natural & Applied Sciences
- Best Graduating Student – Department of Computer & IT, Veritas University

STEPHANIE NWANKWO

Backend Engineer | Mobile App Developer

No. 2 Moshoeshoe Street, Kaduna, Nigeria

+234 803 329 6399

stephanienwankwo0@gmail.com

www.linkedin.com/in/nwankwo-stephanie-4ba1311a7

PROFESSIONAL SUMMARY

Innovative Software Engineer with over 7 years' experience designing backend systems, mobile applications, and cloud-ready architecture across fintech, health-tech, and e-commerce industries. Demonstrates mastery in API development, database engineering, and cross-functional collaboration, consistently improving system performance and user experience. Highly skilled in React Native, Node.js, PostgreSQL, and DevOps tooling, with a commitment to writing clean, scalable code. Adept at problem-solving, leading technical execution, and delivering impactful features under tight deadlines. Passionate about solving real-world problems and collaborating with diverse engineering teams.

EXPERIENCE

Backend & Mobile App Developer — IFARMERS Agricultural Products Services Limited

Agrolinker Project

Abuja, Nigeria

April 2024 – Present

- Developed cross-platform mobile applications using React Native + Expo for farmers to access market data, logistics, and credit services.
- Implemented offline-first mobile architecture using SQLite and background sync.
- Integrated push notifications, deep linking, and biometric authentication.
- Built scalable backend APIs and messaging gateways for real-time agent–farmer interactions.
- Optimized app load time by 45% and improved device compatibility across Android versions.

Mobile Engineer — MedTrack Health Systems

Abuja, Nigeria

February 2022 – December 2024

- Built NFC-powered mobile healthcare features for patient onboarding and medical data access.
- Implemented camera-based scanning for lab results and prescriptions.
- Designed biometric login, JWT authentication, and encrypted data storage.
- Published and maintained app releases on Google Play using EAS.
- Created a mobile design system for consistent UI across screens.

Backend & Mobile Developer — IleBank Digital Finance

Lagos, Nigeria

June 2020 – June 2022

- Built the mobile onboarding app supporting KYC capture, ID upload, and wallet funding.
- Implemented secure in-app payment flows and transaction tracking.
- Integrated WebSockets for real-time transaction updates.
- Managed CI/CD pipelines for mobile builds and OTA updates.

Mobile App Developer — Ahia-Oma E-Commerce

Enugu, Nigeria

August 2018 – June 2020

- Developed an e-commerce mobile app featuring product listings, cart, and order tracking.
- Integrated Paystack and Flutterwave SDKs for payments.
- Implemented search, filtering, and wishlist with persistent storage.
- Added Firebase analytics for tracking user behavior.

Backend Developer Intern — CoLab Innovation Hub

Kaduna, Nigeria

June 2016 – September 2018

- Developed small-scale mobile applications for internal training and demos.
- Worked on UI screens, navigation, and API integration with React Native.

- Performed testing, debugging, and device-compatibility validation.
- Assisted developers with Android/iOS builds using Expo.

EDUCATION

B.Sc. Computer Science

Veritas University, Abuja

2014 – 2018

SKILLS

Backend Development

- Node.js, Express.js, Fastify, PostgreSQL, MongoDB, RESTful APIs
- Mobile App Development
- React Native, Expo, EAS Build, Push Notifications, Mobile Navigation, Local Storage, Offline Sync

Tools & DevOps

- Git, GitHub, Docker, Postman, Firebase, CI/CD Basics
- General Software Skills
- Debugging, API Integration, SDLC, UML, Clean Code, Testing

ACCOMPLISHMENTS

- Led a team of 5 to win first place at a Banking System Hackathon.
- Delivered backend systems supporting 20+ employees with 100% uptime.
- Successfully built and deployed 10+ production-grade APIs.
- Led a team that won the Agrolinker Software Exhibition Award.

UGOCHUKWU NDUKA

Backend Engineer | DevOps Engineer

Abuja, Federal Capital Territory, Nigeria

9011315224 |  ndukaugochukwu9@gmail.com

PROFESSIONAL SUMMARY

Innovative Backend & DevOps Engineer with expertise in designing scalable APIs, automating CI/CD pipelines, and engineering secure backend services using Node.js, NestJS, and TypeScript. Strong experience with cloud platforms (AWS, GCP), containerization (Docker), infrastructure automation, and mobile application collaboration. Skilled in building robust systems for identity verification, mobile applications, ML-powered prototypes, and real-time platforms. Recognized for a strong analytical background, excellent documentation skills, and the ability to integrate backend systems seamlessly with frontend and mobile applications.

EMPLOYMENT HISTORY

Backend Developer — IFARMERS Agricultural Products Services Limited

Agrolinker project

Abuja, Nigeria

March 2024– present

- Developed secure user authentication flows, role-based access management, and farmer-agent workflow automation.
- Optimized database schemas and query performance, improving speed of key endpoints by 42%.
- Integrated AI-generated pricing insights, produce recommendations, and logistics predictions into backend workflows.
- Implemented background job scheduling for notifications, produce updates, and market price broadcasts.
- Worked closely with frontend, mobile, and data teams to ensure consistent API consumption across platforms.

- Deployed backend services on cloud infrastructure using Docker, CI/CD pipelines, and automated testing suites.

Backend & DevOps Engineer — IDCODE Nigeria, Abuja

Sept 2025 — Present

- Architect and implement backend systems for identity verification and access management solutions.
- Designed a secure CI/CD pipeline enabling automated builds, testing, and deployment across environments.
- Built and documented APIs for seamless integration with internal and external systems.
- Ensured platform reliability through monitoring, containerization, and infrastructure security best practices.

Backend Engineer — Woost App (Remote)

Jan 2025 — Aug 2025

- Engineered backend services and core API infrastructure for the Woost mobile application.
- Designed and implemented scalable system architecture using Node.js and TypeScript.
- Developed and documented RESTful endpoints for mobile and web integrations.
- Implemented authentication and security standards to enhance user safety.

Mobile App Developer Intern (React Native) — Haqqman Technologies, Abuja

Jun 2024 — Oct 2024

- Developed cross-platform mobile applications using React Native and Expo.
- Improved app performance through debugging, optimization, and UI refinement.
- Participated in code reviews, ensuring adherence to engineering best practices.
- Integrated REST APIs into mobile features for real-time functionality.

Machine Learning Intern — National Center for Artificial Intelligence and Robotics (NCAIR), Abuja

Jun 2023 — Oct 2023

- Supported development of ML models for AI-driven solutions.
- Preprocessed datasets to improve model accuracy and reliability.
- Collaborated with software teams to integrate machine learning outputs into applications.
- Assisted in production deployment of ML models.

EDUCATION

BSc. Computer Science — Veritas University, Abuja

Jan 2022 — Jul 2025

Graduated with First Class Honors

High School — Marist Brothers' Juniorate

Aug 2018 — Oct 2021

Graduated with High Honors (WASSCE)

SKILLS

Backend Engineering

- Node.js, Express.js, NestJS
- TypeScript, JavaScript
- PostgreSQL, MongoDB
- API Design & Documentation (Swagger, Postman)

DevOps & Cloud

- Docker, Kubernetes
- AWS, GCP
- CI/CD (GitHub Actions, Jenkins)
- Linux, Bash scripting

Mobile Development

- React Native

- API Integration
- Debugging & Performance Optimization

Additional Skills

- System architecture design
- Microservices
- Version control (Git)
- Machine Learning basics (Python, model deployment)

PROJECTS

Quantum Ring-LWE Algorithm – Research Project

- Designed a secure lattice-based cryptographic algorithm using Ring Learning With Errors (RLWE).
- Analyzed mathematical frameworks and implemented algorithmic improvements for quantum-resistant security.

Expense Tracker API

- Developed full backend API for tracking income and expenses.
- Implemented scheduling, task automation, and recurring transactions.
- Built CI/CD pipelines using GitHub Actions and deployed on GCP.

Gigs – Student Matching Algorithm

- Built sorting and matching algorithms to pair recruiters with top university talent.
- Deployed scalable backend with Docker and Kubernetes.

Career Path Finder

- Developed an API to recommend career paths using MBTI personality traits.
- Integrated with an AI model developed Integrated with an AI model

OGBUIGBA JENNIFER HOMA

Full-Stack Designer | AI Engineer

Phone: 08104719805

Email: jenniferogbuigba40@gmail.com

PROFESSIONAL SUMMARY

Creative and forward-thinking Full-Stack Designer and Developer with a unique blend of visual design expertise, frontend engineering capabilities, and applied AI/ML experience. Adept at conducting comprehensive UX research, analyzing user behavior, and transforming insights into intuitive wireframes, prototypes, and full-scale product interfaces. Skilled in translating Figma concepts into highly responsive, accessible, and production-ready frontend experiences using modern web technologies such as React, JavaScript, and component-driven architectures.

Experienced in leveraging data science and machine learning to personalize user experiences, improve product decision-making, and enhance digital intelligence across platforms. Demonstrates strong collaboration and communication skills, consistently bridging the gap between design, engineering, and user needs. Known for exceptional problem-solving, attention to detail, and the ability to deliver digital products that are visually compelling, technically robust, and aligned with modern usability and accessibility standards. Passionate about creating future-ready solutions that merge creativity, technology, and human-centered innovation.

EXPERIENCE

Full-Stack Designer — Woost Digital Health

Abuja, Nigeria

February 2024 – February 2026

- Designed accessible interfaces for a women's health/PCOS mobile app using Figma.
- Created user journeys, wireframes, and high-fidelity prototypes for diverse user groups.
- Collaborated with developers to ensure smooth implementation of UI/UX features.
- Conducted usability reviews and improved design based on user testing insights.

UI/UX Designer — Community House Media

Remote

February 2022 – February 2024

- Designed user experiences for a fan–artist engagement platform with free and premium tiers.
- Built flows for live concerts, private chats, and artist discovery.
- Designed wireframes and prototypes ensuring smooth transitions across feature sets.
- Worked closely with product and engineering teams to refine interactions and usability.

Frontend Developer — Independent / Personal Projects

Remote

February 2020 – February 2022

- Built responsive interfaces using HTML, CSS, and JavaScript.
- Developed dynamic components and SPA features using React.
- Converted Figma designs into fully functional UI components.
- Applied accessibility and mobile-first development principles.

Data Analyst & ML Research Assistant — Academic & Personal Projects

Abuja, Nigeria

February 2018 – February 2020

- Performed exploratory data analysis using Python, Excel, and Power BI.
- Trained and fine-tuned a BERT model for sentiment analysis of student mental-health texts.
- Integrated ML predictions into a web-based recommendation system.
- Visualized insights to support academic research reports.

EDUCATION

B.Sc. Computer Science (First Class Honors)

Veritas University, Abuja, Nigeria

2014 - 2018

SKILLS

Design & UX

- Figma, Wireframing, Prototyping, User Research, User Flows, Interaction Design

Frontend Development

- React, JavaScript, HTML, CSS, Responsive Design

Data / Machine Learning

- Python, NumPy, Pandas, Power BI, BERT, Hugging Face Transformers

Tools & Version Control

- Git, GitHub, VS Code

Soft Skills

- Communication, Teamwork, Critical Thinking, Time Management, Problem Solving

ACCOMPLISHMENTS & INTERESTS

- Built and deployed a real-time sentiment analysis system using BERT integrated into a recommendation platform.
- Passionate about solving real-life problems using technology, particularly in wellness and education.
- Enjoys continuous learning, participating in hackathons, and contributing to open-source projects.
- Interested in human-centered design, AI-enhanced products, and digital wellness tools.
